

INTRODUCING  
**CRUCK SPACES**

# Bespoke Timber Spaces, Designed Around You

Not every project fits within a standard structure.

**Cruck Spaces** is where we step beyond our core range to design and build bespoke timber structures, tailored to the exact requirements of your space.

Whether for a hospitality venue, commercial environment or private setting, each build is crafted to suit how it will be used.

## Designed Without Constraints

While our standard structures provide a strong foundation, **Cruck Spaces** allows for greater flexibility in both form and function.

From footprint and layout to detailing and finish, each project is approached individually - ensuring the final structure integrates seamlessly with its surroundings and purpose.

## Built for Long-Term Use

**Cruck Spaces** are typically delivered as permanent or semi-permanent installations.

Designed with longevity in mind, they provide a durable and visually striking alternative to temporary solutions - creating spaces that feel considered, intentional and built to last.

## Crafted in Timber

At the core of every Cruck Space is our commitment to timber frame construction.

Combining traditional craftsmanship with modern engineering, each structure offers both strength and character - resulting in spaces that are as functional as they are visually distinctive.

## Designed for a Range of Applications

**Cruck Spaces** can be adapted to suit a wide variety of uses, including:

- Pub gardens and hospitality environments
- Outdoor dining and bar areas
- Commercial and venue spaces
- Garden rooms and private outdoor settings
- Semi-permanent and permanent installations

## A More Considered Approach

Rather than working within the limitations of off-the-shelf solutions, **Cruck Spaces** are designed to respond to the space itself - resulting in environments that feel cohesive, practical and visually refined.

# Let's Build Something Unique

If you're looking to create a space that goes beyond the standard, get in touch.

We'd be happy to explore how a bespoke **Cruck Spaces** structure could be designed around your project.

Our structures are available for purchase and installation across the UK. We work closely with each client to ensure the final build is tailored to both the space and how it will be used.

# What our customers think

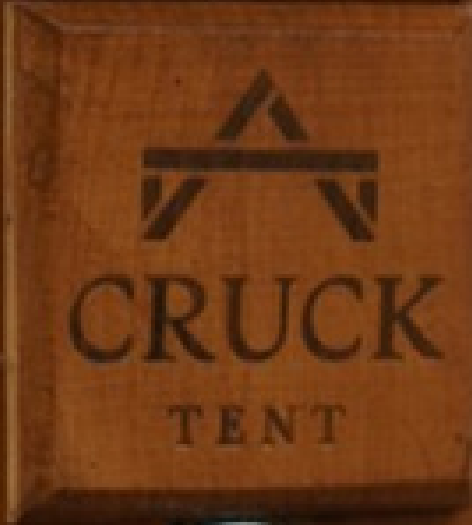

“We purchased a Cruck for our outdoor seating area and it’s turned out to be a phenomenal investment. Our customers absolutely love it, it looks incredible and very durable. The guys at Cruck were super great to work with, the install was very smooth and so far we have had no issues. I have no doubt we will be returning to them for more builds in the future ”

## Stakd. Burger

“Excellent experience with Harry and the team. They are efficient and reliable. We now have a much-improved outside space. Head to The Yard Hereford to check it out! Thanks guys!”

**Martin Zoeller**
